

Modular wall systems for operating and clean rooms

Product features

- Full wall system, lightweight construction (nonstructural)
- Easy dis- and reassembling
- Revision friendly handling of installations
- To be combined with various glass wall systems
- Easy installation of cables and components between wall shells

Surface material wall panels

(Shell construction with clip system)

- Steel (powder coated)
- Stainless steel (polished/satined/powder-coated)
- HPL
- STARON

Sub construction

Edged steel sheet profiles (galvanized or coated)

Special requirements

- Easy to clean
- Resistant to various detergents and disinfectants
- Application in radiation protection area possible due to lead lamination
- Wall heating system to be integrated

Technical information

- Wall thickness 100mm
- Joint width 4mm (sealing or silicone profile) (Exception STARON: almost invisible joints)
- Dimension between axes/standard grid 1200mm
- Wall height up to 5000mm
- Sound protection (wall system) up to 54dB $R_{w,P}$
- Fire protection according to requirements

Powder-coated stainless steel

HPL
